

Virtual Worlds: Trust, Security, Rule of Law

TrustVWs 2009

Venice, Italy, 9 December 2009

<http://www.usercentricmedia.org/workshops/trustvws2009/>

in conjunction with

First International Conference on User Centric Media – UCMedia 2009

The workshop focuses on legally ruled collaboration in virtual worlds (VWs) in the light of security and trust. Virtual worlds are treated not as a game but as an extension of the real world. The approaches discussed can be viewed from different perspectives – informatics, law and legal informatics. The rule of law, a legal principle, is extended to virtual worlds. Most virtual worlds, e.g. Second Life, are of client-server architecture. Therefore certain disputes can be solved by administrators. The workshop aims at peer-to-peer virtual world platforms. The issues targeted at user-centric media community consist of personalisation, real-time, 3D, chat and social context. Special attention is given to future Internet perspectives, in particular, technological, legal and content related perspectives.

The objectives of the workshop are to encompass research advances and to create a community of researches around the described issues of virtual worlds.

Topics of interest (not limited to)

- virtual world security
- public-key infrastructure in VWs; time stamping
- use cases; user needs
- P2P architectures
- trust models; trust management systems
- avatar reputation models
- setting rules and laws; legal issues
- democracy; voting
- online dispute resolution
- virtual world engines; scripting
- education scenarios; learning support

Targeted communities of interests

- informatics
- legal informatics
- jurists

Invited speaker

Tentative title "On legal issues in virtual worlds", by Prof. Dr. Gerald Spindler, Chair of Civil Law, Commercial and Economic Law, Comparative Law, Multimedia and Telecommunication Law at the University of Göttingen, Germany, <http://www.lehrstuhl-spindler.uni-goettingen.de>

Important dates

- **Paper submission:** 13 September 2009
- Notification of acceptance: 19 October 2009
- Publishable papers: 8 November 2009

Submission

Extended abstracts should be submitted via ASSYST system <http://www.assyst-online.org/> (2 pages, LNICST format). Publication of selected papers is planned in LNICST by Springer, same publication as UCMedia 2009 conference proceedings. Workshop papers will be up to 6 pages.

Programme committee

- Vytautas Čyras – Vilnius University, Lithuania (chair)
- Peeter Laud – Cybernetica AS, Estonia
- Gerald Spindler – University of Göttingen, Germany
- Francesco Zuliani – Nergal, Italy

Workshop organisers

- Vytautas Čyras – vytautas.cyras@mif.vu.lt, <http://www.mif.vu.lt/~cyras/>
- Marianna Panebarco – Panebarco & C., Italy, marianna@panebarco.it, <http://www.panebarco.it/>

Organising is partially supported by EU DG InfSo FP7-ICT-2007-1 VirtualLife project (Secure, Trusted and Legally Ruled Collaboration Environment in Virtual Life), <http://www.ict-virtuallife.eu/>
